

L1+L5 GPS/Timing Antenna, RHCP Polarized, 1.166 to 1.218 GHz | 1.559 to 1.606 GHz

GP-L1-L5-40-N

The GP-L1L5-40-N GPS Dual Band antenna recovers timing and positioning data for timing reference and phase synchronization. It filters and amplifies global positioning system signals received from GNSS, Galileo, GLONASS, BeiDou, QZSS, and IRNSS satellite constellations.

The GP-L1L5-40-N antenna is designed with an integrated 40 dB LNA and operates within the L5 1.166 to 1.216 GHz and L1 1.559 to 1.606 GHz bands. Increased position accuracy in densely populated urban canyons, flexible installation, and improved system security, are all advantages of this design.

The GP-L1L5-40-N GPS is compatible with several existing mounting brackets. It is fully ruggedized unit and IP67 Rated. The LNA is DC fed through the Type N Female connector and is externally grounded.
